Reasons for Allowance

Claims 1-34 are allowed.

This is examiner's statement of reasons for allowance.

The instant invention recites an image reading apparatus comprising a reading position setting unit adapted to move the document reading unit, irradiate the feed roller with light from the light source at each position to which the document reading unit is moved, cause said photoelectronic converter to output an electric signal that conforms to amount of light reflected from the feed roller at each position, detect a range in a sub-scan direction over which this electric signal exceeds a predetermined threshold value, and set a position at the center of this range as a reading position.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
